

6370SE

MEDIUM INTENSITY THRESHOLD LIGHT

Fixture shown with #961 Frangible Coupling and #1170-03 Baseplate

The 6370SE Medium Intensity Light is used for elevated threshold/end lighting.

The fixtures are certified to FAA L-861SE under Advisory Circular 150/5345-46 and meet the requirements of ICAO Annex 14.

Die cast aluminum fixture body supports a clear smooth heat resistant outer dome and colored inner lenses in a precise position with respect to the prefocused filament of the lamp. Fixtures mount directly on 2" Frangible Coupling or on 2" EMT with EMT Frangible Coupling.

L-861SE threshold/end lights use a 120W 6.6A quartz lamp. Easy lamp replacement is accomplished by loosening one thumbscrew and lifting entire optic lens assembly from base unit.

ORDERING INFORMATION

Basic Fixture Assembly

Color/Color:

G = Green

O = Obscure (Blank)

R = Red

W = White (Clear) (not FAA certified)

A = Amber (not FAA certified)

B = Blue (not FAA certified)

omit for Basic Fixture Assembly only

Fixture Mounting Height, inches:

Standard Height is 10"

14 = 14"

20 = 20"

24 = 24"

30 = 30"

Fixtures over standard height

include longer cable and 2" EMT

cut to proper length.

How to order:

Add optional items to basic fixture assembly in the following manner:

Add color and height requirements.

Examples:

(1) 6370SE-24 is the Basic Fixture Assembly, less lenses, for 24" high mounting.

(2) 6370SE-GO-20 is a L861SE Unidirectional Threshold Light, with Green light on one side and no light (Obscured) on other side, 20" high.

(3) 6370SE-RG-30 is a L861SE Bidirectional Threshold Light, with Red light on one side and Green light on other side, 30" high.

Note: Lamp and Frangible Coupling to be ordered separately
